

Application No. 10/800,616
Response dated: June 12, 2007
Reply to OA of: February 13, 2007

terminology is not required. *In re Bond*, 910 F.2d 831, 15
USPQ2d 1566 (Fed.Cir. 1990).

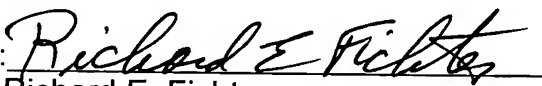

Applicants most respectfully submit that the cited reference Ching-Chen discloses that the wires (12,13) are regular in shape. The wires (11,12), however, of the present invention are irregular in shape, therefore making the present invention structurally different from Ching-Chen's invention as would be appreciated by one of ordinary skill in the art. These are claim limitations which cannot be ignored and fully distinguish the claimed structure from that of the prior art. This is also true with respect to the ball of claim 2 which is a claim limitation which cannot be ignored.

Furthermore, the wrinkled net (bath scrubber) of the present invention is made of the irregular wires and the wrinkles thereof are denser, so that the bathing touch and the amount of bubbles produced are more than the cited reference. Accordingly, it is most respectfully requested that this rejection be withdrawn.

In view of the above comments, favorable reconsideration and allowance of all the claims now present in the application are most respectfully requested.

Respectfully submitted,

BACON & THOMAS, PLLC
